

A.I Diagnostic Report

Date:

Caries (Decay)

Current Nurow version model 1.0

- Number of teeth in the image: 8
- Number of potential decayed teeth in the image: 4
 - ↑ Confidence
- Number of restored teeth in the image: 3
 - Indication of historical caries rate
 - ↑ Confidence
- % of decay identified within known hotspots: 100%
 - Proximity to contact point
 - Under restoration
 - ↑ Confidence

Patient clinical data

High sugar intake ↑
OH regime: ETBx2 ↓
Rare interdental cleaning ↑

Bone-Level

Current Nurow version model 1.0

- Number of teeth on image: 8.5
- CEJ reference point identified: 8.5 teeth
 - Reference point for accepted normal bone level
- Impediments to original bone level projection
 - 4 overlapping teeth
 - ↓ confidence
- Confidence in current bone level tracing
 - 99%
- 2 teeth with marginal discrepancies
 - ↑ Confidence
- Confidence in findings: 98%

Patient clinical data

OH regime: ETBx2 ↓

Rare interdental cleaning

- ↑ Confidence

Last Scaling completed: unknown input ↔

Social History:

Smoking 10/day

- Smoking confers a considerably increased risk of periodontal disease ↑
- Theory impaired inflammatory and immune responses to periodontal pathogens ↑
